

BUSINESS CLIMATE MONITOR JUNE 2016

Produced by Institute for Public Policy Research

The **IJG Business Climate Monitor** fell by 1.08 points in June 2016 to a level of 52.6 points. This is the fourth consecutive decline in the index and the largest fall in three months. Of the 31 indicators measured by the index, 17 showed deterioration over the past year, while the remaining 14 indicators showed improvement.

Building plans, both approved and completed, have come under severe pressure over the past few months, with declines in volume and often value becoming more the norm than the exception. Particularly notable is building plans approved, which on a rolling 12-month cumulative basis have decline aggressively since mid-2013. The slowdown in the number of building plans approved has been largely driven by a lack of serviceable land in Windhoek as opposed to the popular belief that water restrictions in the Khomas region has been the causal factor.

On the export front, the Namibia dollar prices of export commodities have seen very different performance over the past year with the deflated prices of copper and uranium both down when compared to a year ago. However, diamond and gold prices have improved significantly since this time last year, when deflated and measured in Namibia Dollars.

The general business climate in the country remains fairly challenging, as major macroeconomic policy has turned from pro-cyclical expansion to pro-cyclical tightening.

Note on methodology

The index encompasses 30 indicators selected from available high frequency data. These are split into five broad categories, namely: policy environment, primary sector output, secondary and tertiary output, external account and pricing. Given the available high frequency data, these categories provide the best available high frequency insight into developments in the local economy and business cycle.

The raw data are adjusted and transformed for seasonality, inflation and exchange rate as appropriate. In addition, the data are adjusted to factor in whether higher or lower values are desirable (for example higher government spending is positive for the business climate, while higher interest rates are negative).

In order to develop a stationary indicator (i.e. not trending up or down), and to show dispersion from a mean value, the common PMI (Purchasing Managers' Index) approach has been slightly adjusted and utilised. This approach sees transformed indicators that are contracting over a 12-month period given a value of 0, while unchanged indicators are valued at 50 and expanding indicators valued at 100. The average value across the 30 indicators is then taken, with an overall value of over 50 implying expansion in the majority of indicators, while a value below 50 shows contraction in the majority of indicators. In addition to the level, the trend of the BCM line illustrates whether indicators are generally improving or deteriorating. A 12 period moving average is then used to smooth the indicator and ensure that short term volatility or base effects do not provide a misleading view of the local business climate.

When compared to the historic business cycles, this approach gives a satisfactory high-frequency view of the state of the local business climate.

Indicators

Indicator	Higher Value Better	Transformation	Leading
Policy Environment			
Prime Rate	No	None	Yes
Monthly Government Spending (N\$)	Yes	Deflated	Yes
Primary Sector Output			
Livestock marketed (#)	Yes	Seasonal Adjustment	No
Copper Production (tons)	Yes	None	No
Gold Production (kg)	Yes	None	No
Diamond Production (000' carats)	Yes	None	No
Uranium Production (short tons)	Yes	None	No
Secondary and Tertiary Output			
Building Plans Completed (N\$)	Yes	Deflated, Seasonal Adjustment	No
Building Plans Approved (N\$)	Yes	Deflated, Seasonal Adjustment	Yes
Tourism Arrivals (#)	Yes	Seasonal Adjustment	No
Passenger Vehicle Sales (#)	Yes	Seasonal Adjustment	No

Commercial Vehicle Sales (#)	Yes	Seasonal Adjustment	No
Credit Extended to Individuals (N\$)	Yes	Deflated, Seasonal Adjustment	No
Credit Extended to Businesses (N\$)	Yes	Deflated, Seasonal Adjustment	Yes
CC Registrations (#)	Yes	Seasonal Adjustment	Yes
Company Registrations (#)	Yes	Seasonal Adjustment	Yes
Defensive Name Registrations (#)	Yes	Seasonal Adjustment	Yes
External Account			
Imports (N\$)	No	Deflated, Seasonal Adjustment	Yes
Exports (N\$)	Yes	Deflated, Seasonal Adjustment	No
EURZAR Exchange rate	Yes	None	Yes
USDZAR Currency Exchange rate	Yes	None	Yes
Prices			
Beef Price (N\$)	Yes	Deflated, Seasonal Adjustment	No
Lamb Price (N\$)	Yes	Deflated, Seasonal Adjustment	No
Copper Spot (N\$)	Yes	Converted to ZAR, Deflated	Yes
Gold Spot(N\$)	Yes	Converted to ZAR, Deflated	Yes
Diamond Rough Price (Index)	Yes	Converted to ZAR, Deflated	Yes
Uranium Spot (N\$)	Yes	Converted to ZAR, Deflated	Yes
Brent Crude Oil (N\$)	No	Converted to ZAR, Deflated	Yes
Petrol (95 Octane) (N\$)	No	Deflated	No
Diesel (500 ppm) (N\$)	No	Deflated	No
