

# BUSINESS CLIMATE MONITOR NOVEMBER-

At the close of November 2017, the **IJG Business Climate Monitor** continued its upward trajectory. An increase of 0.54 points was recorded for November, bringing the index to just over 48 points. The leading indicator climbed a healthy 4.7 points after a 3.6 point increase in October. This suggests that the economy is still in a contractionary period, although it is contracting at a slower rate. Should this trend continue, it points to growth in 2018.

Of the 31 indicators measured by the index, 18 increased during November, while the remaining 13 deteriorated. Commodity prices remained flat – except uranium, which saw an increase of 16.5% to US\$23.25 (well below the price required by domestic mines). On a 12-month basis, uranium, copper and gold prices have seen growth (of 31%, 9% and 16% respectively), which is encouraging for the long-term outlook of the industry. Credit extended to individuals continued to subside, particularly in instalment credit, which is reflected by the trend in slowing vehicle sales. Weaker passenger and commercial vehicle sales are a reflection of the contractionary pressures both households and corporates find themselves facing. On a more positive note, approvals in building plans increased by over N\$80 million in November. Annual inflation remained unchanged, easing some of the burden on consumers, especially in the run-up to the festive season.

## Note on methodology

The index encompasses 31 indicators, selected from available high-frequency data. These are split into five broad categories, namely: policy environment, primary sector output, secondary and tertiary output, external account, and pricing. Given the available high-frequency data, these categories provide the best available high-frequency insight into developments in the local economy and business cycle.

The raw data is adjusted and transformed for seasonality, inflation and exchange rate as appropriate. In addition, the data is adjusted to factor in whether higher or lower values are desirable (for example higher government spending is positive for the business climate, while higher interest rates are negative).

In order to develop a stationary indicator (i.e. not trending up or down), and to show dispersion from a mean value, the common PMI (Purchasing Managers' Index) approach has been slightly adjusted and utilised. This approach sees transformed indicators that are contracting over a 12-month period given a value of 0, while unchanged indicators are valued at 50 and expanding indicators valued at 100. The average value across the 30 indicators is then taken, with an overall value of over 50 implying expansion in the majority of indicators, while a value below 50 shows contraction in the majority of indicators. In addition to the level, the trend of the BCM line illustrates whether indicators are generally improving or deteriorating. A 12-period moving average is then used to smooth the indicator and ensure that short-term volatility or base effects do not provide a misleading view of the local business climate.

When compared to the historic business cycles, this approach gives very a very satisfactory high-frequency view of the state of the local business climate.

## Indicators

Indicator	Higher Value Better	Transformation	Leading
Policy Environment			
Prime Rate	No	None	Yes
Monthly Government Spending (N\$)	Yes	Deflated	Yes
Primary Sector Output			
Livestock marketed (#)	Yes	Seasonal Adjustment	No
Copper Production (tons)	Yes	None	No
Gold Production (kg)	Yes	None	No
Diamond Production (000' carats)	Yes	None	No
Uranium Production (short tons)	Yes	None	No
Secondary and Tertiary Output			
Building Plans Completed (N\$)	Yes	Deflated, Seasonal Adjustment	No
Building Plans Approved (N\$)	Yes	Deflated, Seasonal Adjustment	Yes
Tourism Arrivals (#)	Yes	Seasonal Adjustment	No
Passenger Vehicle Sales (#)	Yes	Seasonal Adjustment	No

Commercial Vehicle Sales (#)	Yes	Seasonal Adjustment	No
Credit Extended to Individuals (N\$)	Yes	Deflated, Seasonal Adjustment	No
Credit Extended to Businesses (N\$)	Yes	Deflated, Seasonal Adjustment	Yes
CC Registrations (#)	Yes	Seasonal Adjustment	Yes
Company Registrations (#)	Yes	Seasonal Adjustment	Yes
Defensive Name Registrations (#)	Yes	Seasonal Adjustment	Yes
External Account			
Imports (N\$)	No	Deflated, Seasonal Adjustment	Yes
Exports (N\$)	Yes	Deflated, Seasonal Adjustment	No
EURZAR Exchange rate	Yes	None	Yes
USDZAR Currency Exchange rate	Yes	None	Yes
Prices			
Beef Price (N\$)	Yes	Deflated, Seasonal Adjustment	No
Lamb Price (N\$)	Yes	Deflated, Seasonal Adjustment	No
Copper Spot (N\$)	Yes	Converted to ZAR, Deflated	Yes
Gold Spot (N\$)	Yes	Converted to ZAR, Deflated	Yes
Diamond Rough Price (Index)	Yes	Converted to ZAR, Deflated	Yes
Uranium Spot (N\$)	Yes	Converted to ZAR, Deflated	Yes
Brent Crude Oil (N\$)	No	Converted to ZAR, Deflated	Yes
Petrol (95 Octane) (N\$)	No	Deflated	No
Diesel (500 ppm) (N\$)	No	Deflated	No
NCPI (Index)	No	Seasonal Adjustment	Yes
